

# BRIDGEWAY Dual Enrollment

## How Dual Enrollment Benefits Your Child

- ✔ Prepares your student for the academic challenges they will face in college. Dual Enrollment exposes your student to the types of courses, assignments, and testing they will see when in college.
- ✔ Saves money on college tuition. The average student in the 2016 class graduated with over \$37,000 in debt! Dual Enrollment credits help ease the burden that student loans create by saving you money on high school and college credits!
- ✔ Helps your student be seen as competitive by college admissions counselors. Dual Enrollment says, "This student is ready for college and will be an asset to our school."
- ✔ Gives your student every advantage they need to get into the school of their dreams. Dual Enrollment looks great on a college application. It prepares your student for college-level courses, and it saves money. All of this adds up to better opportunities and a brighter future.
- ✔ Guarantees college credits, something AP courses cannot do. With DE courses through ACE, your student's Dual Enrollment credits are likely to be accepted at over 1,800 colleges and universities across the U.S.

**Choose from over 65 3-credit courses!**
